

Web Applications Testing — Assignment 3

This is the second half of the Expedia web automation project.

In the Expedia home page, after you click the Search button to submit your query, you will be directed to the result page. But it takes a while for the result to be fully loaded.

Wait until the result is fully loaded, and print out the departure time, arrival time (need to indicate whether the arrival time is next day), and price for each result entry.

For example,

The print-out text for the following result entry is

| | | | | |
|--|----------------------------|---------------------|-------------------------|--|
|  | 5:55p - 5:16a +1 United | 8h 21m SJC - EWR | 1 stop 2h 15m in DEN | \$435.20 roundtrip Select |
| Flight details and baggage fees ⌵ Satisfactory Flight (6.3 out of 10) | | | | |

Departure time: 5:55p

Arrival time: 5:16a (next day)

Price: \$435.20

And the print-out text for the following result entry is

| | | | | |
|---|------------------------|---------------------|---------|--|
|  | 6:35a - 3:15p Delta | 5h 40m SFO - JFK | Nonstop | \$445.20 roundtrip Select |
| Flight details and baggage fees ⌵ Very Good Flight (8.3 out of 10) | | | | |

Departure time: 6:35a

Arrival time: 3:15p

Price: \$445.20
